Forecast for Sunday 05 Nov 2023

Weather: A day of bright spells and occasional blustery showers, these focused across western areas of the Park where some could turn heavy with the risk of isolated hail and thunder. Many hills in east staying dry and enjoying the best of the sunshine through the day. Showers occasionally wintry across very highest peaks. Likely cloudier through the evening with more frequent showers expected.

Chance of cloud-free hill tops above 800m: 40% in west. 70% in east.

Low Cloud and visibility: Generally good or very good, becoming moderate or poor in showers, very poor in snow within cloud with bases lowering 600m at times, particularly in the west during the morning and in showers.

Meteorologist's View

Severe wind chill across higher peaks Sunday.

Forecast for Monday 06 Nov 2023

Weather: Rather breezy overnight with clear spells and passing showers; these locally heavy. By day a mix of sunny spells and fast-moving showers. Western areas catching the bulk of the outbreaks, these potentially heavy with hail and thunder. Snow level around highest tops.

Maximum wind: Westerly increasing 20-25 mph with gusts reaching 35 mph across most exposed ridges and summits.

Chance of cloud-free hill tops above 800m: 40% in west and 70% in east.

Low Cloud and visibility: Mostly good or very good, becoming briefly moderate or poor in showers. Very poor within cloud with bases lowering 500m at times, chiefly in the west as showers push through.

Temperature: **Valleys:** Plus 4 Celsius increasing 11 Celsius during the afternoon
At 800m: Plus 3-4 Celsius
Freezing level: Above summits
